

Instructions for Hydraulic Ag Gate Box Setup for the G4

The dry application is an optional product. To purchase the unlock, contact your dealer for an IF2/3 Dry unlock code. Next, refer to Chapter Nine for more information about “Authorize Feature Unlock.”

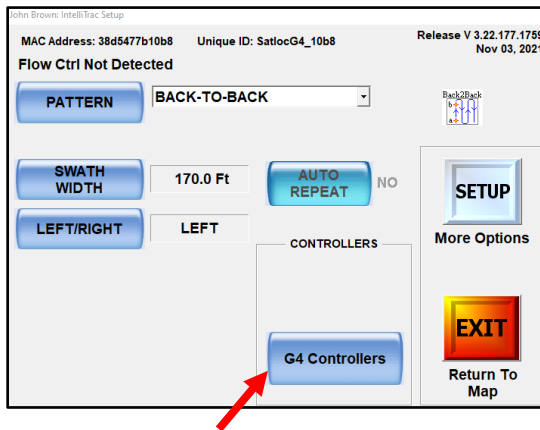

The ag hydraulic gate box must be installed before setting up the G4 with the gate box.

| | Description |
|----------|---|
| Hardware | <ul style="list-style-type: none">Transland Hydraulic Gate Box |
| Software | <ul style="list-style-type: none">On the G4, the recommended IntelliTrac software is 3.22.172.1750 or later |

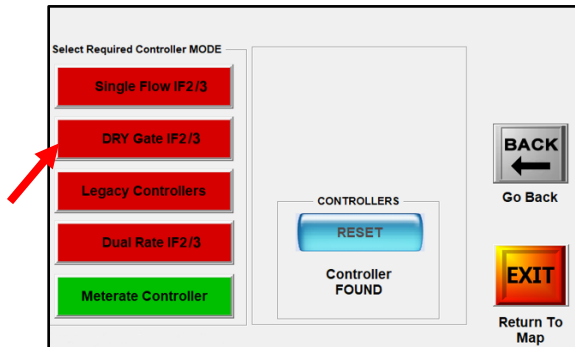

- For the calibration and setup of the IF2/IF3 to work, begin with the gate in the latched/locked position.
- From the Maps screen, select “Setup.”

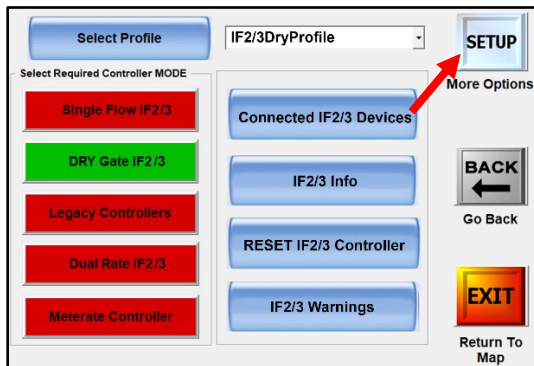

3. Select **"G4 Controllers."**

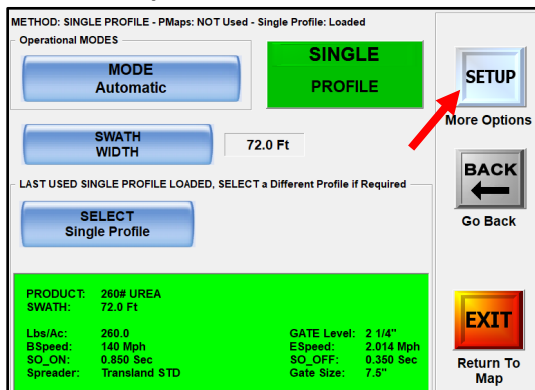

4. Select **"Dry Gate IF2/3."**

5. Select **"Setup."**

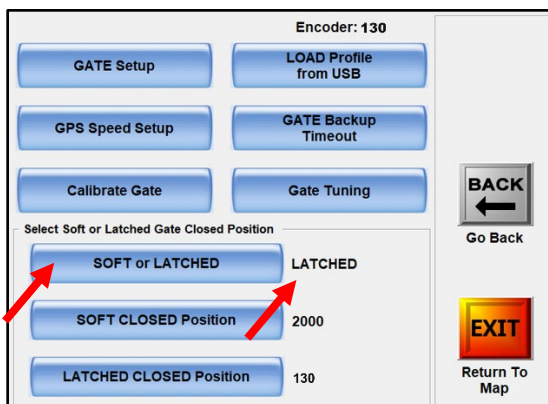

6. Select “Setup.”

7. With the gate latched/locked closed, adjust encoder on the gate until the encoder range for the min value is 130-145. **Note:** If value is not in that range, adjust position sensor to be within that range. The encoder value is adjusted by loosening the screws on the position sensor and rotating it until it is in the min value range.

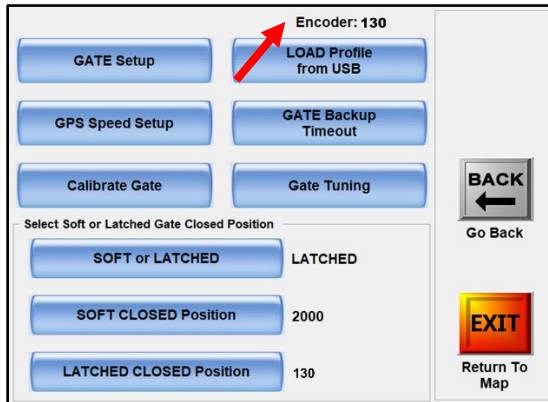

8. Select “Soft or Latched” until side states “latched.”

Position Sensor

9. With it latched, read the encoder value and record it.

Note: The range for the min value is 130-145. If value is not in that range, adjust position sensor on the gate to be within that range.

13. From the dropdown menus, select Min Level, Max Level, and Gate Size.

14. Select “Back.”

15. Select “Calibrate Gate.”

NOTE: It is optional to disconnect hydraulics and then manually adjust the gate. There is a hydraulic disconnect in the cockpit, which is usually a red knob.

Note: The next three steps take two people.

16. For Gate Level 1, bump the gate around until you get the 1/16" – tapping “Gate Up” or “Gate Down” (someone is measuring the gate while the other person is in the cockpit). Once it is set, click “Accept.”

| Level # | Level | Last CAL | Encoder |
|---------------|--------|----------|---------|
| Gate Level 1 | 1/16" | 189 | 0 |

NOTE: The “Set ON TIME Step Period” button can decrease or increase the amount of time sending the command to the pump. Adjusting the time will allow less or more time to get the correct position.

17. Tap “Down” to go to Gate Level 2.
18. Bump the gate to 1/4" – tapping “Gate Up” or “Gate Down” (someone is measuring the gate while the other person is in the cockpit). Once it is set, click “Accept”.

Another option to bump the gate to 1/4" is with the system unarmed and the hydraulic pump disabled, pull the hydraulic bypass to free the gate box door. The door may be moved by hand to achieve the calibration measurements.

19. Follow Steps 10-12 until all Gate Levels are complete. The image below shows the numbers for the different gate levels.

| Level # | Level |
|---------------|--------|
| Gate Level 1 | 1/16" |
| Gate Level 2 | 1/4" |

22. Ensure that the ARM and Primary/Secondary are ON on the Transland Control Panel. The pilot trigger (red button) on the control stick must be up (triggered).

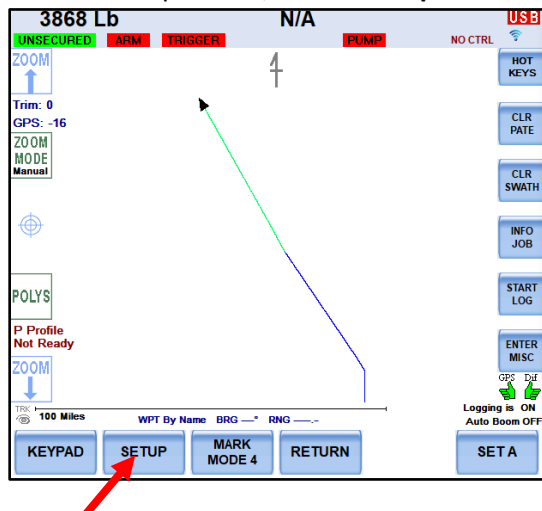

23. Select “Begin Calibration.”

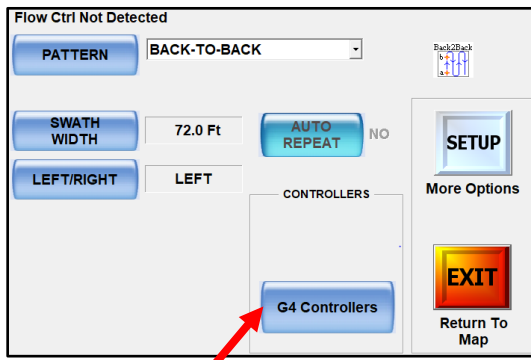

24. When calibration is complete, go back to Map screen by selecting “Exit.”

25. From the Map screen, select “Setup.”

26. Select **"G4 Controllers."**

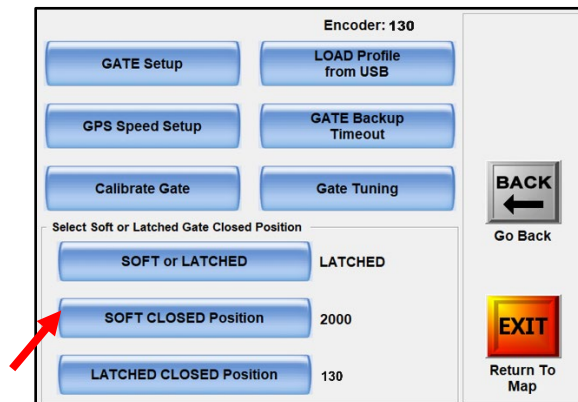

27. Select **"Setup"** two times.

28. Get the gate door to 1/16" of an inch opening.

29. Record encoder value.

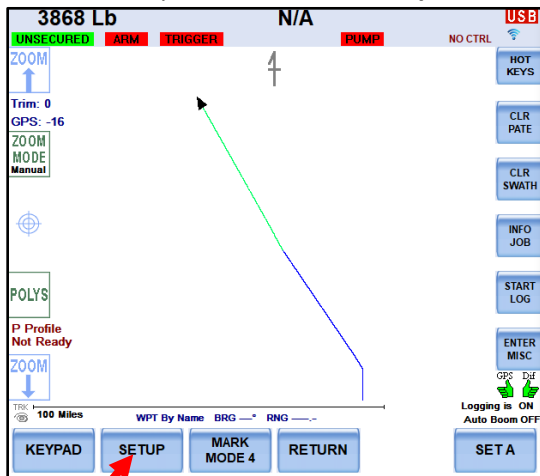

30. Select **"Soft Closed Position"** and enter the encoder value.

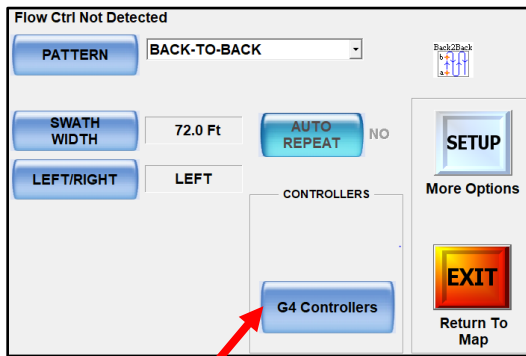

31. Select **"Accept."**

32. Select **"Exit."**

33. From the Map screen, select “Setup.”

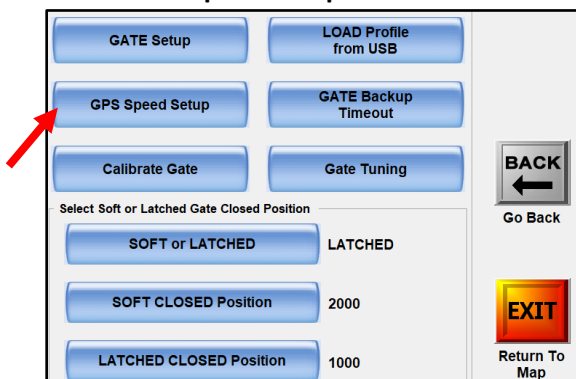

34. Select “G4 Controllers.”

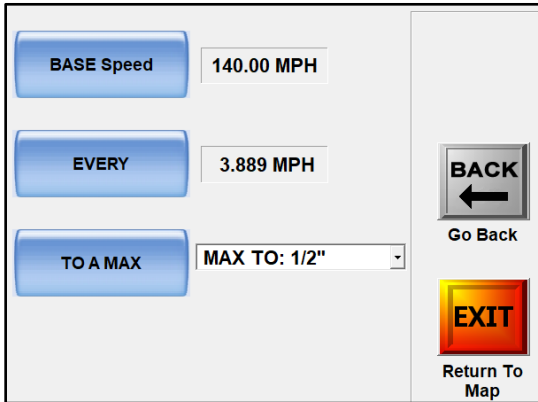

35. Select “Setup” two times.

36. Select “GPS Speed Setup.”

37. Based upon application, enter speed.

A screenshot of a software interface for configuring speed settings. It features three blue buttons on the left: "BASE Speed", "EVERY", and "TO A MAX". To the right of each button is a text box containing a value. The "BASE Speed" box shows "140.00 MPH". The "EVERY" box shows "3.889 MPH". The "TO A MAX" box shows "MAX TO: 1/2" with a dropdown arrow. On the right side of the interface, there are two buttons: a grey "BACK" button with a left-pointing arrow and the text "Go Back" below it, and a red "EXIT" button with the text "Return To Map" below it.
